

Iteration 0 – Plan your project

Please note:

1. Submission is Mandatory
2. Late submissions will be marked zero (no exceptions)
3. Follow the provided template (will be uploaded separately)
4. Online Submission will be provided by only group lead.

You must submit the following contents:

1. Title of your project, (should be meaningful) Type (e.g., desktop app)
2. Problem statement [10 – 15 lines]
3. Problem solution along with scope (a para explaining project boundaries). [10 – 15 lines]
4. Write basic features of your project. (at least 8-10 features other than login sign up)
[name of the feature along with 2-3 liner description]
5. Project plan
 - a. Mention Modular breakdown of the project (decide iterations, each iteration will be a working product). Clearly state the deliverable of each module and list of features to be implemented in each module. *[Make a table and show which module including which user stories will be submitted in which iteration (total 3 iterations, 2 weeks each)]*
 - b. Assign different roles to the group members (e.g., lead, developer, tester, requirement engineer. Architect, etc.) *[Table with names and roles]*
6. Prototype of main feature *[4-6 screens using Pencil tool]*

What you will submit

- Proposal Document

- Pencil Prototype File
